25X1

1. The function of Oila is closely associated with AT (Appararea Teritorialului - Defense of the Territory) in that Oila units are the listening and observation units which notify AT of aerial flights deviating from announced flight plans or of flights of foreign aircraft over Rumanian territory. Communication with AT is [] by radio transmission. [] the listening posts are situated on high ground elevations or other locations suitable for good observation. The listening posts are aware of all aerial activities with their respective sections and at what altitude, speed, and direction the aircraft are flying. [] most Oila units were situated in the Western region of Rumania. []

25X1

25X1

2. The personnel of the unit known as Oila from Cluj were stationed at Oila Barracks (Cazarma) [See Enclosure (A)] and were quartered in the main building. The personnel was quartered in dormitories []

25X1

Soon [] the arrival of approximately 400 recruits, most of whom appeared to be of a poor class since they were dressed in shabby civilian clothing. Uniforms were issued shortly after their arrival. [] The period of instruction for these recruits began soon after arrival []

[redacted] the unit at Cazarma Oila was organized by platoons making up approximately four companies; the commander was a captain. There was a single medic and two male nurses assigned to the installation; [redacted] the medic [redacted]

25X1

[redacted] gave medical assistance to the sick because the medic assigned was away from the installation most of the time. In the Summer of 1951 at Brasov, [redacted] Dr Lt Maj (first lt) Mihai Mircea, who was also a medic, [redacted] was assigned to Oila at Cluj and had traveled to Brasov and to the town of Sfantul Gheorghe /4552N-2547E/ to inspect personnel of Oila who were scattered throughout the Ardeal region.

25X1

3. At each of the three entrances was posted an armed guard; it was not possible to enter the area unless on official business and with the proper identification. Along the entire western perimeter of the area was a cement-covered brick wall approximately two m high; the southern boundary of the area was enclosed by a wall or fence [redacted]

The eastern boundary of the area was adjacent to an area of one story dwellings; [redacted]

25X1

During the night, the pavement for pedestrians, which ran parallel and adjacent to the north perimeter of the area, was blocked off and it was necessary for pedestrians to walk in the street. A guard was posted at the west end of the walk at night and [redacted] the east end was also guarded. [redacted]
